

PROGRESS PARK REED CREEK INTERCEPTOR SEWAGE LINE Wythe County, Virginia

Pillar was hired by Wythe County for full time inspection of the installation of a new sewer line and pump station from Progress Park to an existing main. We observed installation, testing, water monitoring of the new line as well as help solve field problems as they arose. We reviewed the Contractor's pay schedule for accuracy and acceptance as well as provided daily logs of progress and material documentation. Special construction circumstances included boring under Norfolk & Southern Railroad and boring under Reed Creek.
